

YOUR SLIDES MUST INCLUDE

- 1. Bullet points, NOT paragraphs*
- 2. Main Points/Ideas only - do not overcrowd your slides. You will add the details and elaborate on your main points during your presentation (use presenter's notes function in Keynote)*
- 3. No less than size 60 font for your text if you are projecting on AppleTV- the screen is fairly small, thus your text must be quite large for the audience to see.*

No less than size 32 font if you are projecting on the big screen.
- 4. Relevant images/graphics on each slide to hold the audience's attention during the presentation.*
- 5. Clear contrast between font and background. Select your style wisely- you do not want your text blending into the background.**
- 6. Your last slide must include the focus questions for the audience to answer. Please remember that the number of slides in your presentation is irrelevant; it is the quality of each slide that matters.*
